Savant Driver Release Notes

14 Aug 17

The purpose of these release notes are to provide detailed information regarding fixes, enhancements, and known issues related to the Luma IP Camera Control System Drivers.

What It Is

These are the Savant drivers for Luma IP cameras.

Important Note

Please ensure the sub stream on your control system is set to 6 frames per second or higher. Some control systems treat a stream with lower frame rates as if it were an image.

If the Luma Savant profile does not work in your system, please use Savant's Wirepath driver. You can use any non-IP PTZ driver, for example *WPS-750-DOM-IP (Wirepath WPS-750-DOM-IP-BL, Wirepath WPS-750-DOM-IP-WH) [IP]*.

Where to Find It

The Luma Savant drivers are available on your Luma product page under the Support tab.

The Wirepath Savant driver are found in the Savant programming

Features Added

Support of JPEG/MJPEG streaming on cameras on an external network switch and on the PoE port of the NVR.

Known Limitations

H.264 is not supported on this control system.

This is a streaming driver only. PTZ control requires a separate profile. We recommend you use the camera's user interface to operate the pan, tilt and zoom functions.
